Pip, every connection on one sheet

A dot is a joint. A line that hops over another does not touch it. Thick = bare rod of the harness. Thin = insulated wire of the battery storey. Dotted = optional. Ring = tap where a rod carries on.

Never: OUT+ or OUT− to GND, a rail or the frame · anything but A1's 3V3 feeding the screen or the mic
A1's USB and the PowerBoost output at the same time · the frame touching any conductor · the 500 mAh cell
